DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claim 1, 3 and 5 recite, inter alia, "a probing apparatus for measuring the performance of a device under test comprising a first signal input via bias tee and second signal input wherein, first and second signal inputs conductively connected to signal contact tip via source of signal." The above limitations via the signal inputs are used to superimpose a direct current and extracting a direct current component from a combined signal without affecting the high frequency component of the signal. Thus, it can improve the impedance matching and reduce distortion of the modulation signal.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Abe (U.S. 6,605,941) disclose a Method and apparatus for measuring characteristic of specimen and its application to high frequency response measurement with scanning probe microscopes, Abe do not disclose the above-mentioned limitations.

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
